}

skills: {

▸ BACKEND (10yrs): Java, oop/d/a, Python, spring, junit, jboss, tomcat
▸ WEB (5yrs): javascript, react, react-native, angular, node, typescript, state management (ngRx / Redux), REST APIs, webpack, json, css, sass
▸ TDD (3yrs): pytest, jasmine, karma, protractor/selenium, cucumber, wallaby
▸ DEVOPS (2yrs): docker, jenkins, nexus, maven, ant, automation
▸ DBs (5yrs): postgresql, mongodb, mysql, mssql, oracle, firebase
▸ OTHER TECH: unix, linux, osx, win, git, jira, confluence
▸ NON TECH: team building, excellent communication (verbal, written), presentations, agile, scrum, other languages Spanish, Portuguese

},

experience: {

▸ Personal Projects(2017-X): I make time to work on a couple of personal projects:
HomeSlice - a bill-sharing mobile app for roomates written in React Native.
EthBlockExplorer - a simple React JS app to explore the latest Ethereum blocks.
BlockchainTechEvents - a site for researching and curating Blockchain Technology Event listings. Written in Angular.

▸ EXTENSIS(2013- X): Senior Full-Stack Engineer currently working on a full UI re-write for one of the main products. I work very closely with our PO in order to best accommodate our technical desires for the product while considering customer requests and issues. We're now a well oiled machine that is successfully improving almost every aspect of our product. After releases I enjoy mentoring some of the more Junior developers and others interested in becoming developers. (angular, java, spring, postgresql, mysql, mssql, maven, jenkins, git, scrum, python, tdd, docker, rest, selenium)

▸ REVELEX(2006-2009): Java Engineer responsible for providing all back end communication with various airline booking engines via SOAP. Lead developer in re-writing various legacy components to accomodate, faster, leaner architecture. Provided drastic minimization of payloads and improved performance. Incorporated JBoss Drools in order to avoid re-deploys for fast changes to agencies' promotions. This eliminated many phone calls, emails and sped up the process from days to minutes. (java5, tomcat, mysql, php, jboss drools, xslt)

▸ Avisena, ProxyMed(2002-2006): Worked with a large home spun enterprise java engine which handled millions of medical transactions per day (async & sync). I became lead developer of realtime transactions and was eventually promoted to the R&D to help support a new line of business in data. (java, oracle, xml, html, css, tcp/ip, linux)

▸ IBM (2001): 8 months pre-graduation co-op with IBM's NetVista Thin Client Software Team in MN, worked on a major release.

}

ABOUT

I am very excited to move further into web & mobile app development using React and React Native. I enjoy crafting visually pleasant solutions using clean, testable code. I also genuinely enjoy being part of a Team and being a great Team Player. I strive to find ways to elevate my teammates' productivity and improve upon our processes and knowledge base.

INTERESTS

Currently I am very interested in the blockchain space and the technologies involved in decentralized applications and smart contracts.

COMMUNITY

I started a Meetup called Latinx Tech PDX in an effort to help diversify the Portland tech sector. We meet monthly to support each other in tech & career education.

EDUCATION

Florida Int'l University 2002 BS Computer Science

AWARDS

PDX Startup Weekend Latino 2016 - Customer Validation * FIU Honors
